

## COMPANY PROFILE

Arlington Scientific, Inc.<sup>®</sup>, is a leading global medical technology company that develops, manufactures and sells *in vitro* diagnostics, medical devices, diagnostic analyzers and blood donor lounges. Arlington Scientific remains focused on enhancing the quality and speed of diagnosing infectious diseases. ASI manufactures tens of millions of RPR tests annually for over 1,000 labs. As “Your Syphilis Authority™”, ASI’s emphasis and expertise is in syphilis diagnostic reagents and innovative analyzers.

Arlington Scientific’s innovative spirit led to the development of the world’s first semi-automated RPR analyzer designed for the objective interpretation of nontreponemal RPR tests. That first digital particle analyzer evolved into the ASI Evolution<sup>®</sup>, a fully automated platform with a proprietary algorithm that standardizes the interpretation of the RPR test. The ASI Evolution is FDA cleared for blood donor screening and diagnostic testing.

## Products

ASI has established a reputation for innovative, dependable and economical products. ASI’s Products include:

**ASI Evolution<sup>®</sup> Automated RPR Syphilis Analyzer**

Automated nontreponemal RPR testing

**ASi Manager-AT**

Semi-automated nontreponemal RPR testing

**ASI Serology Test Kits**

Rapid, reliable, cost effective

**EIA Infectious Disease Kits**

**Blood Donor Lounges**

**IVT Allergy 3™ Screen**

**Rhino Pro Nasal Cytology  
Curette**

**Bulk Reagents**

## Mission Statement
