Date: 15 November 2011  
Release: Immediate

Topic: Arlington Scientific, Inc. (ASI) Receives FDA Clearance for the ASiManager-AT™  
The World's First RPR Digital Agglutination Test Card Reader

---

### **Arlington Scientific, Inc. (ASI) Receives FDA 510(k) Clearance for the ASiManager-AT™ The World's First RPR Digital Agglutination Test Card Reader for Clinical Diagnostic Testing**

**Springville, Utah USA – Arlington Scientific, Inc. (ASI)**, a market leader in the manufacturing and distribution of RPR, VDRL and TPHA worldwide, announced today that it has received 510(k) clearance (K111356) for the ASiManager-AT™ for clinical diagnostic testing. The ASiManager-AT™ is designed to provide standardized test interpretation, an initial predictive titer analysis, and provides for storage, retrieval, and transmittal of the test results.

The ASiManager-AT™ tabletop system includes an imaging unit, software, and an integrated CPU providing easy- to- use technology requiring minimal training. With ASI manufactured RPR Card Tests for Syphilis, the ASiManager-AT™ also provides a unique and reliable system to compliment and extend RPR card testing giving a high degree of accuracy.

The ASiManager-AT™ digital reader is a powerful tool that can aid in standardizing the interpretation of RPR testing avoiding the subjectivity and variability of visual reading. It is also valuable in reducing the overall time of performing the RPR test in high volume settings and provides archived records for documentation of test results

The ASiManager-AT™ Digital Agglutination Test Card Reader is also CE Marked for sale in the member states of the European Union.

For over 25 years, ASI has been a worldwide leader in USA manufacturing and distribution of serology and medical equipment to laboratories, hospitals and blood donor facilities worldwide. ASI's quality products, superior customer service and reliability set them apart in today's marketplace.
