ARLINGTON SCIENTIFIC, INC

FOR IMMEDIATE RELEASE

“COST-EFFECTIVE OPEN PLATFORM EIA TESTING SOLUTION”

Springville, UT and Palm City, FL – October 1, 2015 – Arlington Scientific Incorporated (ASI) and Awareness Technology, Inc. announce a strategic partnership that will enhance the quality and speed of diagnostic testing. The two quality-driven companies are teaming up to bring a series of new products to the US market. The initial offering includes a cost-effective automated EIA platform and several FDA cleared reagent kits.

“This synergistic partnership is based upon two American organizations working together to meet an essential customer need for affordable and fully automated EIA testing. This is the perfect capstone for our 30-year celebration at ASI.” Ben Card, CEO, Arlington Scientific Inc.

Arlington Scientific’s expertise and proficiency in the infectious disease market coupled with ASI’s prominent brand position and strategic distribution partners sets an ideal foundation to introduce this state-of-the-art solution to clinical laboratories and blood banks across the country.

Awareness Technology, manufacturer of both instrumentation and EIA test kits, has a strong history of quality, reliability, and cost-effectiveness in the international and OEM markets. The state-of-the-art solution and its reagent systems will be launched under the ASI brand utilizing its distribution partner network starting in 2016.

“ASI’s strong market presence and distribution relationships make them an ideal partner for bringing our proven technology to the US market.” Mary Freeman, President, Awareness Technology Inc.

About Arlington Scientific, Inc.

Arlington Scientific, Inc. (ASI) is a leading global medical technology company that develops, manufactures and sells in-vitro diagnostics, medical devices, diagnostic analyzers and blood donor lounges. Throughout its 30-year history, ASI remains focused on enhancing the quality and speed of diagnosing infectious diseases. As the “Syphilis Authority”, ASI has particular emphasis and expertise in syphilis diagnostic reagents and innovative analyzers. www.arlingtonscientific.com
